

LETTER OF SUPPORT FOR SENATE BILL 1747 "AN ACT COMBATING CLIMATE CHANGE"

Dear Senator or Representative: (for name go to [www.malegislature.gov](http://www.malegislature.gov) and enter your Zip Code)

After reading multiple articles about putting a fair price on the cost of carbon and rebating the resulting revenue back to the people and businesses, I ask you, as my representative, to give your full support and vote to passing the Barrett Bill S 1747, or its equivalent. I agree with the vast majority of economists who say that putting a fee on carbon pollution is the most effective way to decrease the use of carbon based fuels. The success of a similar law in British Columbia in reducing its carbon usage while improving its economy shows that using market forces to combat climate change works. Massachusetts is in the perfect position to become a leader and be the first state to pass a carbon fee. Other states, and eventually the federal government, are very likely to follow.

Thank you for your support, for thinking long-term, and for making the environment less hostile for my descendants and me.
